

Exhibit D.1

The below identification of how HopDrive's Accused Products meet at least each and every limitation of claims 1-5, and 12-15 of U.S. Patent No. 10,304,027 ("the '027 patent) is exemplary. Throughout the chart, references to HopDrive and Social Auto Transport should be viewed as interchangeable, as the two names refer to the same company and Social Auto Transport is currently doing business as HopDrive.

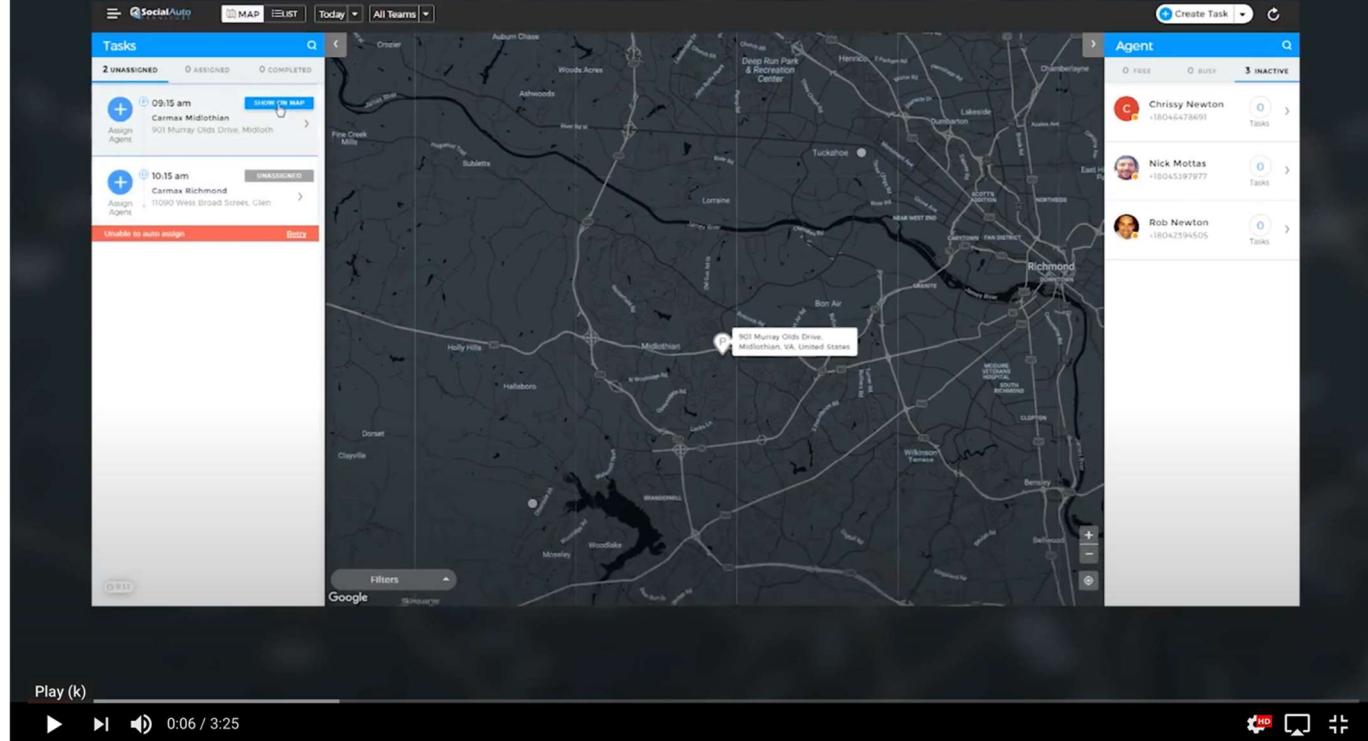

HopDrive's infringing system is offered through at least: (1) HopDrive's website, for example, through the Move Planner interface in the Dealer Portal, and (2) HopDrive Apps including, for example, the Social Auto Transport app featuring the Driver Portal (collectively "the Accused Products").

U.S. Patent No. 10,304,027	HopDrive's Accused Products
[1(pre)] One or more non-transitory computer-readable media storing computer-executable instructions that, when executed by a processor, perform a method of displaying an interface for a trip-scheduling system.	<p>HopDrive's system is integrated on one or more non-transitory computer-readable media storing computer-executable instructions that, when executed by a processor, perform a method of displaying an interface for a trip-scheduling system.</p> <p>  </p> <p>Schedule a HopDrive</p> <p>Schedule a move in our easy-to-use Dealer Portal. In most cases, our drivers can be on location within 90 minutes. Customers get a visual of the driver, the vehicle, and the step-by-step tracking in real-time.</p> <p>HopDrive Arrives</p> <p>Upon arrival, the driver inspects the car and takes photos to document its condition, pre-trip. Your dealership and the customer both receive copies of the inspection report, with pictures, in the portal.</p> <p>HopDrive Delivers</p> <p>Upon delivery, the driver inspects the car and takes photos to document its condition, post-trip. We document end mileage, then share information with you and the customer in the portal.</p> <p>https://hopdrive.com/dealer-overview</p>

<p>method comprising the steps of:</p>	 <p>https://marketplace.fortellis.io/solutions/social-auto-transport-inc/hopdrive?id=3eac4c50-06ee-42dc-b995-2c5159f70974</p>
<p>[1(a)] displaying a location selection page operable to receive input of a plurality of locations from a user via a map interface. For example, HopDrive's system includes a map interface (shown in the image below) that includes a "create task" button. On information and belief, the "create task" button can be used to input a plurality of locations.</p>	

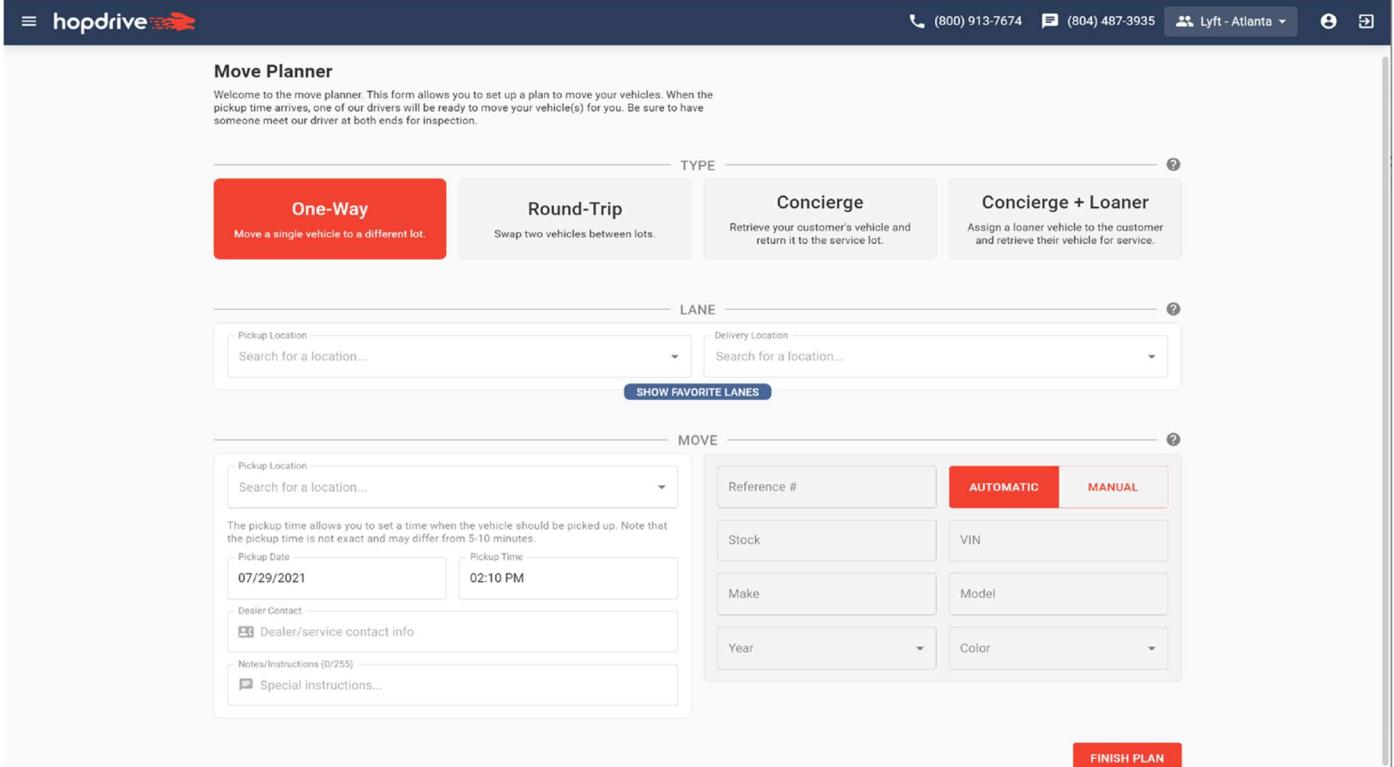

via a map interface;

Vehicle Move Process Overview

<https://www.youtube.com/watch?v=4KHyavk8Bqs>

To the extent that HopDrive contends that their trip scheduling system method does not “display[] a location selection page operable to receive input of a plurality of locations from a user via a map interface,” upon information and belief, HopDrive’s system features a map interface that provides the option for a user to “create task” which allows the user to input a plurality of locations under the doctrine of equivalents. Therefore, HopDrive’s trip scheduling system method using a location selection page featuring a map interface performs substantially the same function, in substantially the same way, to obtain substantially the same results as the “displaying a location selection page operable to receive input of a plurality of locations from a user via a map interface” claim limitation of Draiver’s trip

	<p>scheduling system method. Accordingly, to the extent there are any differences between HopDrive's method of displaying an interface for a trip-scheduling system and the claimed method they are not substantial. i</p>
[1(b)] displaying a vehicle selection page operable to receive input of an indication of a vehicle to be transported;	<p>HopDrive's system displays a vehicle selection page operable to receive input of an indication of a vehicle to be transported. As an example, the Move Planner interface is a vehicle selection page operable to receive input of an indication of a vehicle to be transported.</p>  <p>https://marketplace.fortellis.io/solutions/social-auto-transport-inc/hopdrive?id=3eac4c50-06ee-42dc-b995-2c5159f70974</p> <p>As another example, through the “add moves” button in the image below, indications of vehicles to be transported may be provided.</p>

	<p>The screenshot shows the HopDrive dashboard interface. On the left, there are filtering options for 'Concierge' (checked) and 'Group By Customer'. Below that are sections for 'Status' (Planning, Pickup, Delivery, Completed, Cancelled) and 'Make' (Audi, BMW, Buick, Cadillac, Chevrolet, Dodge, Ford, GMC, Honda, Hyundai, Jeep, Land Rover, Lexus, Nissan). The main area is divided into 'ACTIVE MOVES' and 'PLANNED MOVES'. Under ACTIVE MOVES, there are three cards for a 2016 GMC Yukon White, a 2018 Audi Q7 Black, and a 2015 Hyundai Elantra Black. Each card shows the vehicle details, pickup/delivery times, and tracking numbers (CH7485, WB9283, CH7471). Under PLANNED MOVES, there are six cards for a 2017 Cadillac Escalade ESV Black, a 2011 Lexus GX Silver, a 2016 Land Rover Range Rover Sport, a 2012 Nissan Murano Gray, a 2018 Chevrolet Colorado Black, a 2018 Hyundai Sonata Black, a 2018 Ford Escape White, a 2020 Dodge Ram White, a 2018 Honda Fit, a 2019 Ford Transit, a 2017 Jeep Compass Blue, and a 2017 Jeep Cherokee Black. Each card displays the vehicle details, pickup/delivery times, and tracking numbers.</p> <p>https://marketplace.fortellis.io/solutions/social-auto-transport-inc/hopdrive?id=3eac4c50-06ee-42dc-b995-2c5159f70974</p>
[1(c)] displaying a task selection screen operable to receive an indication of a task to be received	<p>On information and belief, HopDrive's system displays a task selection screen operable to receive an indication of a task to be performed by the driver for the vehicle.</p> <p>On information and belief, HopDrive provides a trip overview interface that includes a task selection screen that can be used to indicate a task to be performed by the driver (i.e., agent) for the vehicle such as through the "create task" button.</p>

performed by the driver for the vehicle;

As an example, HopDrive promotes the option for scheduling aftermarket work for a car. On information and belief, the HopDrive system can be used to select a pick-up location, a task (e.g., a shop that does aftermarket work), and a drop off location to take the vehicle to once the aftermarket work is complete.

More Ways to Use HopDrive

Here are just some of the ways we drive vehicles...

For Your Customers

- ✓ Pickup and delivery
- ✓ Loaner drop-offs
- ✓ Retail Deliveries
- ✓ At-home test drives
- ✓ Remote appraisals

For Your Business

- ✓ Reconditioning
- ✓ Load Balancing
- ✓ Post auction pickup
- ✓ Aftermarket work
- ✓ Same-day moves

[HopDrive | Dealer Overview](#)

As another example, HopDrive's system provides a concierge service that will move a car from "driveway to dealership and back". That is, a request to drive a target vehicle on a trip to a destination location (e.g., driveway) can include a task (e.g., taking the car to the dealership) and can be received via an interface in HopDrive's system.

Your customers want concierge.

Impress your customers with a concierge service that takes their car from driveway to dealership and back, with minimal effort.

[HopDrive | Dealer Overview](#)

HopDrive provides a concierge service that will move a car from “driveway to dealership and back”. That is, a request to drive a target vehicle on a trip to a destination location (e.g., driveway) via a task location (e.g., dealership) can be received via a HopDrive interface.

Your customers want concierge.

Impress your customers with a concierge service that takes their car from driveway to dealership and back, with minimal effort.

[HopDrive | Home](#)

To the extent that HopDrive contends that their trip scheduling system method does not employ “displaying a trip overview page operable to receive a selection of a pick-up location for the vehicle from the plurality of locations, a task location for the task for the vehicle from the plurality of locations, and a drop-off location for the vehicle from the plurality of locations,” upon information and belief, HopDrive’s system satisfies this claim element under the doctrine of equivalents. Upon information and belief, the above map interface provides the option for a user to “create task” which allows the user to input a plurality of locations which satisfies this claim element under the doctrine of equivalents. Therefore, HopDrive’s trip scheduling system method displaying a trip overview page performs substantially the same function, in substantially the same way, to obtain the substantially the same result as the “displaying a trip overview page operable to receive a selection of a pick-up location for the vehicle from the plurality of locations, a task location for the task for the vehicle from the plurality of locations, and a drop-off location for the vehicle from the plurality of locations” claim limitation of Draiver’s method. Accordingly, to the extent there are any differences between HopDrive’s method of displaying an interface for a trip-scheduling system and the claimed method, they are not substantial.

[1(e)]
determining a
driver from a
pool of
available
drivers to
drive the
vehicle from

On information and belief, HopDrive’s system determines a driver from a pool of available drivers to drive the vehicle from the pick-up location to the drop-off location. The below image shows that HopDrive’s system has an “auto assigning” functionality that provides one example of how HopDrive’s system will assign drivers to the automatically generated trips. Once the task is assigned to a driver, the assigned driver is notified and can accept or decline the trip.

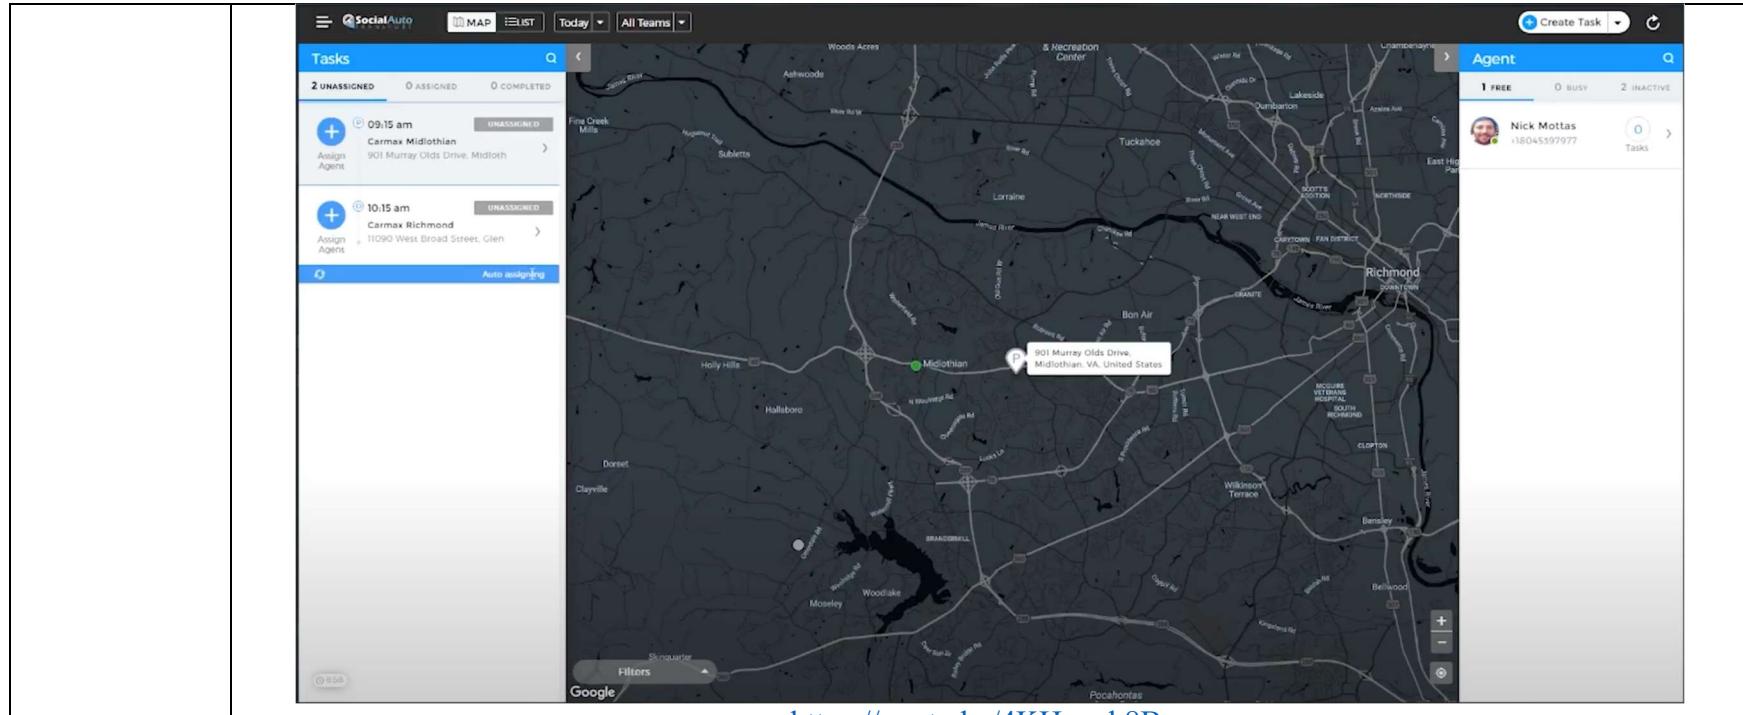

the pick-up location to the drop-off location; and

The screenshot shows a mobile application interface titled "Tasks". At the top, there are three status counts: "2 UNASSIGNED", "0 ASSIGNED", and "0 COMPLETED". Below this, two task entries are listed:

- Task 1:** Due at 09:15 am, located at Carmax Midlothian (901 Murray Olds Drive, Midlothian). Status: UNASSIGNED. Action: Assign Agent.
- Task 2:** Due at 10:15 am, located at Carmax Richmond (11090 West Broad Street, Glen). Status: UNASSIGNED. Action: Assign Agent.

A blue button labeled "Auto assigning" is visible at the bottom of the list.

As shown in the right pane, below, there is a task a pool of agents (i.e., drivers) and with different statuses (free, busy, inactive). The “auto assigning” feature can automatically assign a driver based on their status.

<https://youtu.be/4KHyavk8Bqs>

The below screenshot also indicates that HopDrive determines a driver from a pool of drivers.

[5] The computer-readable media of claim 1, wherein the method further comprises the step of obtaining by-the-trip insurance from an insurance	<p>On information and belief, HopDrive's system obtains by-the-trip insurance from an insurance provider for transporting the vehicle from the pick-up location to the drop-off location. On information and belief, HopDrive insures drivers while the drivers are driving. HopDrive's insurance "provide[s] coverage for drivers from the time they take possession of a customer's vehicle." See https://hopdrive.com/driver-overview. HopDrive explains that they "know exactly what the insurance cost will be for each car move."https://www.freightwaves.com/news/social-auto-transport-raises-15m-in-seed-funding-to-expand-gig-economy-auto-moving-business</p>

provider for transporting the vehicle from the pick-up location to the drop-off location.

What HopDrive covers

While the driver app is OFF

- Only your personal insurance policy applies.

While the driver app is ON

- Waiting for a move request** - Your personal insurance policy applies.
- While enroute to the customer's pickup location** - Your personal insurance policy applies.
- While driving the customer's vehicle** - This is where the HopDrive insurance policy applies.

<https://hopdrive.com/driver-overview?resource=1>

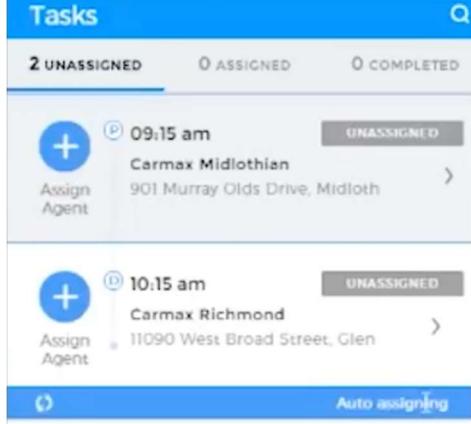

Social Auto Transport describes how they insure each driver as they drive by the mile.

Insurance was a big issue that Mottas and Newton had to deal with as well. The company is insured through James River Insurance, a Richmond-based insurance provider. Social Auto pays for its insurance by the mile, allowing it to keep its costs down and also to know exactly what the insurance cost will be for each car move, which helps with transparent pricing.

"They were the ones that pioneered gig economy insurance with Uber back in the day, and they just happen to be in my hometown," Mottas said. "They've been able to insure us in the ways we need to be insured for us and our customers."

Gig economy drivers, he said, also like the Social Auto Transport model because they are paid for moving a vehicle but incur any of the costs such as fuel, insurance and vehicle wear and tear typically associated with a gig economy driving job.

<https://www.freightwaves.com/news/social-auto-transport-raises-15m-in-seed-funding-to-expand-gig-economy-auto-moving-business>

	<p>↳ How does the insurance work if I'm driving another person's car?</p> <p>HopDrive insures all of our drivers. We have tiered levels of liability insurance depending on the stage of the delivery, as well as collision coverage for the car. For more information, see our insurance details on the driver overview page.</p>	
[12] The computer-readable media of claim 1, wherein the driver is determined based on a selection by the user.	In HopDrive's system, the driver may be determined based on a selection by the user. For example, the image below shows an "assign agent" button that can be used to assign a driver. 	
Claim 13		
[13(pre)] A computer-	HopDrive's method of scheduling a trip via a graphical user interface is computer implemented via a graphical user interface.	

implemented method of scheduling a trip, via a graphical user interface, comprising the steps of:

Schedule a HopDrive

Schedule a move in our easy-to-use Dealer Portal. In most cases, our drivers can be on location within 90 minutes. Customers get a visual of the driver, the vehicle, and the step-by-step tracking in real-time.

HopDrive Arrives

Upon arrival, the driver inspects the car and takes photos to document its condition, pre-trip. Your dealership and the customer both receive copies of the inspection report, with pictures, in the portal.

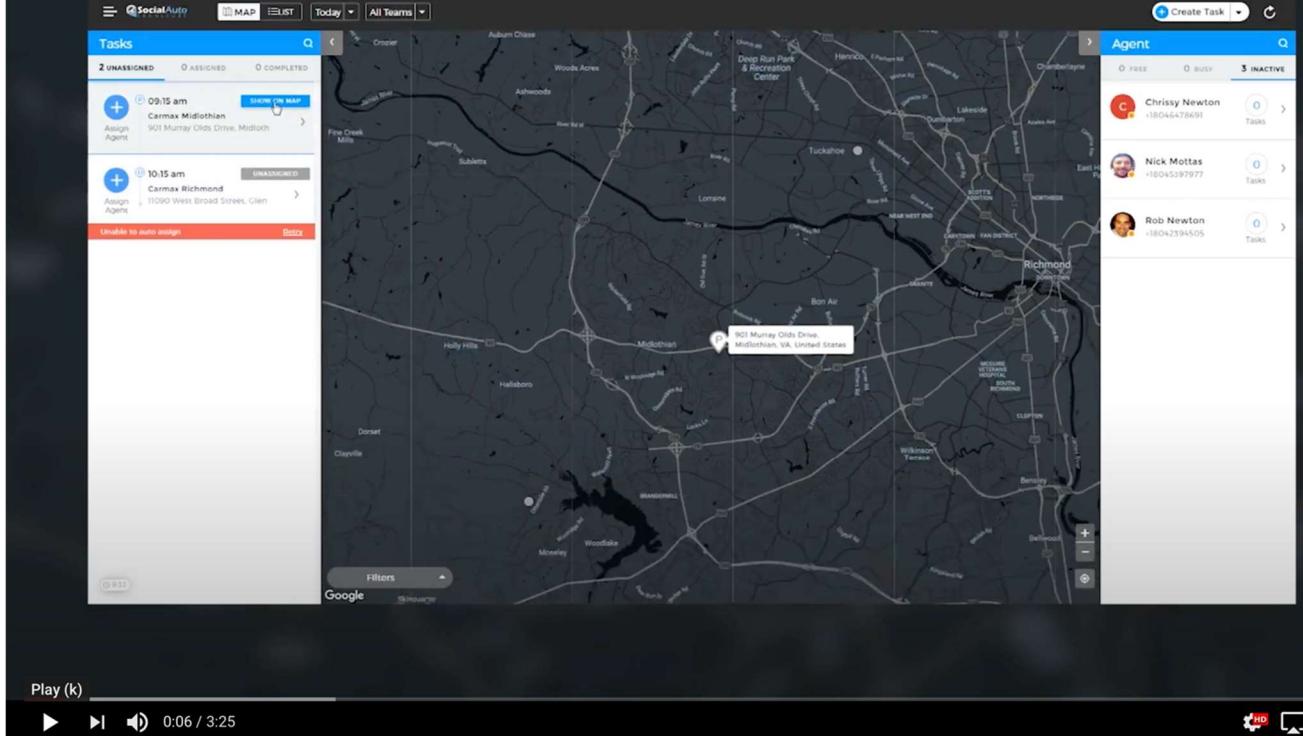

HopDrive Delivers

Upon delivery, the driver inspects the car and takes photos to document its condition, post-trip. We document end mileage, then share information with you and the customer in the portal.
